A study of synoptic charts from 1891 to 1950, contour charts of isobaric surfaces from 1938 to 1950, charts of the mean-monthly distribution of temperature and its deviations from normal, data on the air temperature transition through 0° and +5° from 1891 to 1951, and data on the disappearance of the stable snow cover from 1938 to 1949 showed a clear connection between the macro processes of a winter season and of the spring season immediately following it. Synthesis of Aminosulfones I: p-Aminophenyldialkylaminoalkylsulfones (# Extensive research work on the synthesis and study of various aminosulfones had started during the war. Wartime and early postwar conditions hindered a regular exchange of scientific literature; it was only after considerably delay, therefore, that we learned about the synthesis of these compounds abroad. Since we obtained a number of amino-sulfones and their intermediate products by a method different from that reported, we are publishing this article as a preliminary communication.
